06 Aug 2026	Brown Planthopper	67%	Confident
06 Aug 2026	Earthworms	89%	Confident
06 Aug 2026	Brown Planthopper	67%	Confident

About this report

Pest predictions combine a seasonal outbreak calendar (derived from GBIF occurrence records where available) with live weather at each farm location. Identifications come from a custom-trained convolutional neural network and are reported with a confidence score. This report is advisory: always confirm findings and treatment choices with your local agricultural extension officer before applying any control measure.
